

Stream No. 21 (2 notices)

West side Cochran Bay.

There are 5 small clear-water streams here and 2 big glacier streams.

South side glacier stream is 40 feet wide and 8 inches deep; north side stream slightly larger.

The 5 clear-water streams run about 11 feet wide and 5 inches deep, and have most of the fish, although the short glacier stream on the south has quite a few.

July 26, 1926: 7,000 fish

Aug. 13, 1927: 5,000 fish

Stream No. 22 (2 notices)

West side Cochran Bay.

Width: 20 feet

Depth: 6 inches

Accessible 2,000 feet for fish; then a falls 5 feet high then it runs through a grass flat for quite a distance.

Has fine gravel and sand bottom. No fish above falls. There were a few reds here.

July 26, 1926: 7,000 fish,--a few reds.

Aug. 14, 1927: 7,540 fish

Stream No. 23 (1 notice)

Width: 45 feet

Depth: 2 feet

Is about all glacier water. Has a good fine gravel bottom. The fish are mostly in shallow, slower running break-offs from the big stream, but a few in it.

Aug. 15, 1924: Not much here.

July, 1925: Same condition.

July 27, 1926: 2,500 fish here all told.

Aug. 14, 1927: 2,500 fish.

Stream No. 23A (2 notices)

Blackstone Bay.

Two streams here,--one on each side.

East side Width: 20 feet

Depth: 5 inches

Accessible 2,775 feet,--clear water; has 3/4 of fish.

West side Accessible 2,450 feet.

Both streams have fine gravel bottom, wide stream beds, and slow-running water.

Aug. 14, 1927: 37,450 fish.
